

Meera Krishnan

Application A-01 - Junior Robotics Software Engineer - REQ-2026-014

Skills

Python, ROS 2, Robotics, Git, Gazebo, OpenCV

Experience

Robotics Engineer (Associate), Tarang Automation (Feb 2025 - Aug 2026). Developed ROS 2 nodes for a warehouse mobile robot, implemented the Nav2 costmap tuning, and maintained the Python test harness used for regression runs. Worked in a shared Git repository with review-gated merges.

Projects

Built a differential-drive robot in Gazebo simulation with a ROS 2 control stack. Implemented an OpenCV lane-detection module used for the robot's guidance.

Education

B.E. Robotics and Automation, 2021 - 2025.

Cover Note

I have hands-on ROS 2 and robotics experience from a full-time associate role. I have not worked on cloud deployment.

This document is synthetic demo data generated for the X'O Code 2026 hackathon. It does not describe a real person.
