

Arun Kalyan

Application A-03 - Junior Robotics Software Engineer - REQ-2026-014

Skills

Python, Arduino, Machine Learning, Docker, Git

Experience

No professional experience yet.

Projects

Line-following robot built on Arduino with infrared sensors, programmed in C++. Containerised a small Python web service with Docker for a college assignment.

Education

B.E. Computer Science, 2027. Completed an introductory course in Robotics and a MOOC on Machine Learning.

Cover Note

I have expert knowledge of robotics and advanced machine learning skills. I am familiar with cloud deployment concepts from coursework.

This document is synthetic demo data generated for the X'O Code 2026 hackathon. It does not describe a real person.
