

Farah Sheikh

Application A-12 - Junior Robotics Software Engineer - REQ-2026-014

Skills

C++, Arduino, Raspberry Pi, embedded systems, Python, Git

Experience

Embedded Firmware Intern, Kavach Electronics (Jun 2025 - May 2026). Wrote Arduino firmware for a sensor node and helped bring up a Raspberry Pi gateway. Used Git for source control across the team.

Projects

Line-following and obstacle-avoiding robots built on Arduino with ultrasonic sensors, programmed in C++.

Education

B.E. Electronics and Communication, 2022 - 2026.

Cover Note

I am an expert in robotics from my embedded and Arduino work, and I am confident I can pick up any robotics framework quickly.

This document is synthetic demo data generated for the X'O Code 2026 hackathon. It does not describe a real person.
